Application/Control Number: 10/815,624 Page 2

Art Unit: 2853

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-25, drawn to an ink composition, classified in class 106, subclass 31.27.
 - II. Claims 26-27, drawn to an inkjet printer, classified in class 347, subclass54.
 - III. Claims 28-31, drawn to an ink cartridge, classified in class 347, subclass86.
 - IV. Claims 32-35, drawn to a substrate, classified in class 347, subclass 105.
 - V. Claims 36-54, drawn to a method of enabling entry of data, classified in class 347, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case invention I is a stabilized ink composition and invention II is an inkjet printer using that same ink; invention III is an ink cartridge using the same ink; invention IV is a substrate having the same ink; and invention V is a method of enabling entry of data using same ink. The ink

jet printer can use any kind of ink, it is not necessary that this is the only one ink can use in the inkjet printer.

- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 5. If applicant elects the invention V, then it needs further restriction.
- 6. This application contains claims directed to the following patentably distinct species: group 1 is claims 36-38, 41-44/37, 45-46/36, 51/36, 54/36; Group 2 is claims 39-46, 51/39, 52-53, 54/39; Group 3 is claim 47, 54/47; Group 4 is claims 48-54. The species are independent or distinct because in group 1, claim 36 claiming "..data regarding the identity of the form..."; group 2, claim 39 claiming "..data regarding at least one field..." and same for group 3 and 4, which required different searches.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Page 4

- 7. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- Applicant is reminded that upon the cancellation of claims to a non-elected 8. invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manish S. Shah whose telephone number is (571) 272-2152. The examiner can normally be reached on 8:00am-4:30pm.

Application/Control Number: 10/815,624

Art Unit: 2853

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen D. Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). nzul
